Scorch A. D. Nauman 2001-11-20 In the future world of Scorch, America is run

by a “corporacracy.” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

American Cinema/American Culture John Belton 2012-04-01 American Cinema/American Culture looks at the interplay between American cinema and mass culture from the 1890s to 2011. It begins with an examination of the basic narrative and stylistic features of classical Hollywood cinema. It then studies the genres of silent melodrama, the musical, American comedy, the war/combat film, film noir, the western, and the horror and science fiction film, investigating the way in which movies shape and are shaped by the larger cultural concerns of the nation as a whole. The book concludes with a discussion of post World War II Hollywood, giving separate chapter coverage to the effects of the Cold War, 3D, television, the counterculture of the 1960s, directors from the film school generation, and the cultural concerns of

Hollywood from the 1970s through 2011. Ideal for Introduction to American Cinema courses, American Film History courses, and Introductory Film Appreciation courses, this text provides a cultural overview of the phenomenon of the American movie-going experience. An updated study guide is also available for American Cinema/American Culture. Written by Ed Sikov, this guide introduces each topic with an explanatory overview written in more informal language, suggests screenings and readings, and offers self-tests.

Graced by Waters John Dietsch 2020-04-28 In this inspirational and humorous collection of essays, author John Dietsch sees his addiction to and passion for fishing as a parable that can help us shift from compulsive thinking to mindfulness and a closer connection to God. From creating fishing scenes on the set of *A River Runs Through It* in Montana, to directing fly fishing shows in New Zealand and from exploring deep canyons in California to guiding in Colorado, John shares his experiences and asks the question: what are we really fishing for? Through John's journeys across the globe, we discover that the same pursuit in fishing—of what is elusive but attainable—can be applied to our own spiritual journey. In the end, Dietsch uncovers his own truth under the rocks of a childhood river, recognizing the loss of both his brothers as the path of acceptance and faith that is graced by waters.

Addiction Neuroethics Adrian Carter 2011-11-17 Addiction is a significant health and social problem and one of the largest preventable causes of disease globally. Neuroscience promises to revolutionise our ability to treat addiction, lead to recognition of addiction as a 'real' disorder in need of medical treatment and thereby reduce stigma and discrimination. However, neuroscience raises numerous social and ethical challenges:

- If addicted individuals are suffering from a brain disease that drives them to drug use, should we mandate treatment?
- Does addiction impair an individual's ability to consent to research or treatment?
- How will neuroscience affect social

policies towards drug use? Addiction Neuroethics addresses these challenges by examining ethical implications of emerging neurobiological treatments, including: novel psychopharmacology, neurosurgery, drug vaccines to prevent relapse, and genetic screening to identify individuals who are vulnerable to addiction. Essential reading for academics, clinicians, researchers and policy-makers in the fields of addiction, mental health and public policy.

Intoxication and Society Jonathan Herring 2012-12-21 Intoxicants, substances that alter a person's mental and physiological state, are a continuing obsession. In their effect on the mind and body, intoxicants go to the heart of what it means to be human. In the tensions between 'free' and uninhibited consumption on the one hand, and the pressures of social regulation and personal responsibility on the other, they also illuminate the daily paradoxes, and sheer complexity, of living in modern Western societies. Yet this complexity, and the rich history that underpins it, is often lost in the current debates over public policy. Intoxication and Society sets out to supplement the contemporary discourse surrounding intoxication with a more nuanced appreciation of the history and nature of what is very much a multidimensional problem. It does so by employing an interdisciplinary framework that includes contributions from leading academics in law, sociology, anthropology, history, literature, neuroscience and social psychology. The result is a subtle historical and contemporary rereading of the social construction of intoxication that will provide a secure basis for analysis as society continues to respond to the

problematic pleasures of intoxication.

Women on Ice Miriam Boeri 2013-01-15 Methamphetamine (ice, speed, crystal, shard) has been called epidemic in the United States. Yet few communities were ready for increased use of methamphetamine by suburban women. Women on Ice is the first book to study exclusively the lives of women who use the drug and its effects on their families. In-depth interviews with women in the suburban counties of one of the largest metropolitan areas in the U.S. chronicle the details of their initiation into methamphetamine, the turning points into problematic drug use, and for a few, their escape from lives veering out of control. Their life course and drug careers are analyzed in relation to the intersecting influences of social roles, relationships, social/political structures, and political trends. Examining the effects of punitive drug policy, inadequate social services, and looming public health risks, including HIV/AIDS and hepatitis C, the book gives voice to women silenced by shame. Boeri introduces new and developing concepts in the field of addiction studies and proposes policy changes to more broadly implement initiatives that address the problems these women face. She asserts that if we are concerned that the war on drugs is a war on drug users, this book will alert us that it is also a war

on suburban families.

Crossfire Trail Louis L'Amour 2005-06-28 Rafe Caradec—gambler, wanderer, soldier of fortune—was as hard a man as the battlefields and waterfronts of Latin America could fashion, but he was as good as his word. As Charles Rodney lay dying in a dank ship's fo'c'sle, Rafe swore to make sure that Rodney's Wyoming ranch went to his daughter, Ann. In Painted Rock, Wyoming, Caradec found land for a man to love, miles of rolling grasslands and towering mountains. He also found that one of the most ruthless men in the territory had set his sights on both Rodney's ranch and his daughter. But Rafe Caradec had given his word, and once he'd looked deep into Ann Rodney's eyes, nothing short of death would stop him from keeping the promise he'd made.

Understanding and Treating Sex Addiction Paula Hall 2012-11-08 Sex addiction is on the increase - in the media as well as in the therapy room. But while more and more people seek help for their compulsive sexual behaviours, there is still confusion and debate about whether the condition even exists. Understanding and Treating Sex Addiction explains why an increasing number of people are inadvertently finding their lives devastated by their sexual

behaviours. It explores the latest scientific understandings and research into why pornography, cyber sex, visiting sex workers, fetishes and multiple affairs can come to control some people's lives to the point that they can't stop. It explains how sex addiction is not a moral issue, as some assume, but a health issue that we as a society need to start taking seriously. Throughout the book are the revealing statistics from the UK's latest survey on sex addiction. Three hundred and fifty people who struggle with this condition have bravely and candidly shared their experience for the benefit of their fellow sufferers and those who choose to help them. This book contains support and advice for both the clinician and for those who suffer from sex addiction. As well as practical guidance and techniques for stopping compulsive behaviours and preventing relapse, there is also a thorough exploration of the deeper underlying causes and how these must be addressed.

Africa and the War on Drugs Neil Carrier 2012-10-11 Nigerian drug lords in UK prisons, khat-chewing Somali pirates hijacking Western ships, crystal meth-smoking gangs controlling South Africa's streets, and narco-traffickers corrupting the state in Guinea-Bissau: these are some of the vivid images surrounding drugs in Africa which have alarmed policymakers, academics and the general public in recent years. In this revealing and original book, the authors weave these aspects into a provocative argument about Africa's role in the global trade and control of drugs. In doing so, they show how foreign-inspired policies have failed to help African drug users but have strengthened the role of corrupt and brutal law enforcement officers, who are tasked with halting the export of heroin and cocaine to European and American consumer

markets. A vital book on an overlooked front of the so-called war on drugs.

Addiction Medicine Bankole A. Johnson 2010-10-10 The spectrum of addiction disorders presents practitioners with numerous challenges—among them the widening gap between a growing evidence base and the translation of this knowledge into treatment outcomes. Addiction Medicine addresses this disconnect, clearly explaining the role of brain function in drug taking and other habit-forming behaviors, and applying this biobehavioral framework to the delivery of evidence-based treatment. Its state-of-the-art coverage provides clinically relevant details on not only traditional sources of addiction such as cocaine, opiates, and alcohol, but also more recently recognized substances of abuse (e.g., steroids, inhalants) as well as behavioral addictions (e.g., binge eating, compulsive gambling, hoarding). Current behavioral and medical therapies are discussed in depth, and the book's close attention to social context gives readers an added lens for personalizing treatment. An international panel of expert contributors offers the most up-to-date information on:

- Diagnosis and classification
- Neurobiological and molecular theories of addiction
- Behavioral concepts of addiction
- Clinical aspects of addiction to a wide range of substances, including opiates, stimulants, sedatives,

hallucinogens, alcohol, nicotine, and caffeine Science-based treatment options: pharmacotherapy, pharmacogenetics, potential vaccines, brief and compliance-enhancing interventions, cognitive behavioral treatment, behavioral management, and other psychosocial interventions Behavioral addictions—including compulsive eating, Internet messaging, and hypersexuality—and their treatment Addiction in specific populations, including adolescents, the elderly, pregnant women, and health care professionals Legal, disability, and rehabilitation issues At once comprehensive and integrative, *Addiction Medicine* is an essential text and a practice-expanding tool for psychiatrists, health psychologists, pharmacologists, social workers, drug counselors, trainees, and general physicians/family practitioners.
