KRINK New York City Craig Costello 2020-04-07 Craig Costello, aka KR, grew up in Queens, New York, where graffiti was part of the landscape and a symbol of the city. While living in San Francisco, he quickly garnered attention when his signature "KR" tag popped up throughout the city. As he became one of the more prominent figures on the streets on NYC and San Francisco, he began to hone his craft by creating better tools launching his own line of homemade markers and mops, combining his moniker KR with the word INK. In KRINK: GRAFFITI, ART, AND INVENTION, Costello has compiled a visual memoir: from his early days of the '80s and '90s and launch with the hip New York City retailer Alife, which put his brand on the map, to his evolution as an artist and high-fashion collaborator. The book showcases Costello's seminal style and his extensive body of work, including site specific installations around the world. It also chronicles his myriad collaborations with Alife, Nike, Coach, Moncler, Modernica, Marc Jacobs, Levi Strauss & Co., Mini (BMW), Casio, Smith Optics, Carhartt, Kidrobot, Medicom Toy, agnès b., and Colette, among many others. Today, Costello's reach and influence goes far beyond urban street culture. Krink has grown exponentially into a global artist materials brand with expanding collections of apparel, tools, and accessories, while Costello's unique aesthetic can be seen on objects from sneakers to luxury goods to cars. KRINK is both stylish and informative, capturing the ethos of punk and hip-hop culture, and is sure to appeal to the fans of high/low cultural crossovers, as well as die-hard fans of street art and fashion.

Blood and Earth Kevin Bales 2016-01-19 For readers of such crusading works of nonfiction as Katherine Boo's *Beyond the Beautiful Forevers* and Tracy Kidder's *Mountains Beyond Mountains* comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them. A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world's most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why? Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day slavery is destroying the planet. The product of seven years of travel and research, *Blood and Earth* brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places. *Blood and Earth* calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share. Praise for *Blood and Earth* "A heart-wrenching narrative . . . Weaving together interviews, history, and statistics, the author shines a light on how the poverty, chaos, wars, and government corruption create the perfect storm where slavery flourishes and environmental destruction follows. . . . A clear-eyed account of man's inhumanity to man and Earth. Read it to get informed, and then take action."—Kirkus Reviews (starred review) "[An] exposé of the global economy's

'deadly dance' between slavery and environmental disaster . . . Based on extensive travels through eastern Congo's mineral mines, Bangladeshi fisheries, Ghanian gold mines, and Brazilian forests, Bales reveals the appalling truth in graphic detail. . . . Readers will be deeply disturbed to learn how the links connecting slavery, environmental issues, and modern convenience are forged."—Publishers Weekly "This well-researched and vivid book studies the connection between slavery and environmental destruction, and what it will take to end both."—Shelf Awareness (starred review) "This is a remarkable book, demonstrating once more the deep links between the ongoing degradation of the planet and the ongoing degradation of its most vulnerable people. It's a bracing reminder that a mentality that allows throwaway people also allows a throwaway earth."—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*

Moon Viorel Badescu 2012-03-22 The Earth has limited material and energy resources. Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources. The exploitation of the natural resources of the Moon is a first natural step on this direction. Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon. This will allow developing new technologies, systems and flight operation techniques to continue space exploration. In fact, a new branch of human civilization could be established permanently on Moon in the next century. But, meantime, an inventory and proper social assessment of Moon's prospective energy and material resources is required. This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources. The book collects together recent proposals and innovative options and solutions. It is a useful source of condensed information for specialists involved in current and impending Moon-related activities and a good starting point for young researchers.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

The Art of Intrusion Kevin D. Mitnick 2009-03-17 Hacker extraordinaire Kevin Mitnick delivers the explosive encore to his bestselling *The Art of Deception* Kevin Mitnick, the world's most celebrated hacker, now devotes his life to helping businesses and governments combat data thieves, cybervandals, and other malicious computer intruders. In his bestselling *The Art of Deception*, Mitnick presented fictionalized case studies that illustrated how savvy computer crackers use "social engineering" to compromise even the most technically secure computer systems. Now, in his new book, Mitnick goes one step further, offering hair-raising stories of real-life computer break-ins-and showing how the victims could have prevented them. Mitnick's reputation within the hacker community gave him unique credibility with the perpetrators of these crimes, who freely shared their stories with him-and whose exploits Mitnick now reveals in detail for the first time, including: A group of friends who won nearly a million dollars in Las Vegas by reverse-engineering slot machines Two teenagers who were persuaded by terrorists to hack into the Lockheed Martin computer systems Two convicts who joined forces to become hackers inside a Texas prison A "Robin Hood" hacker who penetrated the computer systems of many prominent companies-and then told them how he gained access With riveting "you are there" descriptions of real computer break-ins, indispensable tips on countermeasures security professionals need to implement now, and Mitnick's own acerbic commentary on the crimes he describes, this book is sure to reach a wide audience-and attract the attention of both law enforcement agencies and the media.

Maternal Megalomania Julie Langford 2013-04-01 Ancient authors emphasize dramatic moments in the life of Julia Domna, wife of Roman emperor Septimius Severus (193–211). They accuse her of ambition unforgivable in a woman, of instigating civil war to place her sons on the throne, and of resorting to incest to maintain her hold on power. In imperial propaganda, however, Julia Domna was honored with unprecedented titles that celebrated her maternity, whether it was in the role of mother to her two sons (both future emperors) or as the metaphorical mother to the empire. Imperial propaganda even equated her to the great mother goddess, Cybele, endowing her with a public prominence well beyond that of earlier imperial women. Her visage could be found gracing everything from state-commissioned art to privately owned ivory dolls. In *Maternal Megalomania*, Julie Langford unmask the maternal titles and honors of Julia Domna as a campaign on the part of the administration to garner support for Severus and his sons. Langford looks to numismatic, literary, and archaeological evidence to reconstruct the propaganda surrounding the empress. She explores how her image was tailored toward different populations, including the military, the Senate, and the people of Rome, and how these populations responded to propaganda about the empress. She employs Julia Domna as a case study to explore the creation of ideology between the emperor and its subjects.

Fresh Meat Jesse Armstrong and Sam Bain 2012-10-11 The ultimate companion to *Fresh Meat*, the award-winning Channel 4 comedy by Jesse Armstrong and Sam Bain What's the secret to JP's sexual prowess? How does Howard beat the buffet every time? What does Vod really think about drink, drugs and Salman Rushdie? And will Kingsley's diary spill his true feelings for Josie? (hopefully not as stomach-churning as Oregon's sext messages with Professor Shales...) Edited by Oregon, and with contributions from all of the housemates, this is a real guide to student life - the one the preachy brochures and prospectuses don't tell you about. From moving into a student house to fresher's week, from choosing courses to choosing friends, the book records every detail - hilarious, sordid, poignant and triumphant - as the young ones stumble through university life. A scrap book of diary entries, manifestos, diagrams and guidelines it includes: JP's weekly shopping list and first Hollywood screenplay, Josie's student recipes for 'Munge' (and 'Chunge'), Vod's literary criticism and hangover cure, Howard's James Bond fan-fiction, Oregon's literary erotica and Kingsley's band reviews and critique of the Ultimate Frisbee Society. 'A worthy successor to *The Inbetweeners* ... the best programme about students since *The Young Ones*' Daily Telegraph on FRESH MEAT 'I never thought I'd enjoy reliving the abject horror of my student days quite as much as I have' Guardian on *Fresh Meat* 'This book's main purpose is to encourage having a laugh, but, like the best laughs, it is based on facts that ring true' Evening Standard Jesse Armstrong and Sam Bain are British comedy writers, who met whilst studying at Manchester University. They have collaborated on acclaimed television comedy shows such as *Smack the Pony*, *Peep Show* and *That Mitchell and Webb Look*, and the films *Magicians* and *Four Lions*. Jesse Armstrong also co-wrote the BAFTA winning *The Thick of It* and *In the Loop*. *Fresh Meat* won Best New Comedy at the British Comedy Awards in 2011.

The Wristwatch Handbook Ryan Schmidt 2016-09 -A fantastic reference work for the novice or the seasoned watch enthusiast-Fully illustrated with 470 color photographs-Brand-Agnostic. Features a vast array of timepieces from over 90 manufacturersDespite the functional obsolescence of the mechanical wristwatch (our phones and computers tell more accurate time) the early 21st Century has seen a boom in the development, production, and appreciation of all things horological. Whether it is presented to the collector as an alternative investment, as a feat of micro-mechanical technology, or as a showcase of artisanal mastery, the mechanical wristwatch has never possessed more forms, functions

or facets than it does today. The Wristwatch Handbook is written from the epicenter of a renaissance, a place in time between the Quartz revolution and the rise of the smart device - where the mechanical wristwatch is the antidote to the microprocessor and the permanent buzz of your inbox. From the multi-axis tourbillon, to the split-second chronograph, to the sidereal sky chart, The Wristwatch Handbook covers it all and does so with more than 470 rich illustrations from over 90 of the World's leading brands. The book is separated into two sections. The first section provides the reader with a comprehensive understanding of the mechanical movement. Its chapters explore power, transmission, distribution and regulation illustrating the basic concepts before considering the innovation and complexity that takes place further toward the cutting edge. From the fifty-day power reserve, to the constant force mechanism, and the 1,000Hz mechanical escapement, section 1 will allow the reader to understand and appreciate what is happening beneath the dial of their watch. Section two allows the reader to take this understanding and apply it to the vast range of complications (functions) that exist in modern horology. Each chapter showcases a distinct category of complication. For example, the regatta timer, pulsometer, and monopusher chronograph join a host of others in a chapter entitled 'Recording Lapses of Time'; The power reserve indicator, dynamograph, and crown position indicator are featured in a chapter for 'Power and Performance Indication'; The moon phase indicator, annual calendar, and planetarium can be found in the 'Astronomical Complications' chapter. Once the functional categories are exhausted, the final three chapters explore whimsical complications that have little regard for practical function, novelty time indication, and the 'super-complicated' watch - a rare breed of timepiece that houses an intimidating host of complications featured throughout the book. Upon completion of The Wristwatch Handbook the reader will be able to identify even the most exotic complication from across the room, and be able to share their appreciation and understanding of what makes it so useful and compelling. The Wristwatch Handbook is "brand agnostic", using only those watches that most aptly illustrate the given subject-matter. As a consequence the book places equal emphasis on the classic and the cutting edge, on watches produced in large volume or exclusive runs, by industry-leading technology or at the hand of a master. In doing so the book provides an unparalleled range of watches from over 90 brands, allowing the reader to determine for themselves which brands, complications, and styles they will build their collection from.
