Borders: A Very Short Introduction Alexander C. Diener 2012-08-06 Compelling and accessible, this Very Short Introduction challenges the perception of borders as passive lines on a map, revealing them instead to be integral forces in the economic, social, political, and environmental processes that shape our lives. Highlighting the historical development and continued relevance of borders, Alexander Diener and Joshua Hagen offer a powerful counterpoint to the idea of an imminent borderless world, underscoring the impact borders have on a range of issues, such as economic development, inter- and intra-state conflict, global terrorism, migration, nationalism, international law, environmental sustainability, and natural resource management. Diener and Hagen demonstrate how and why borders have been, are currently, and will undoubtedly remain hot topics across the social sciences and in the global headlines for years to come. This compact volume will appeal to a broad, interdisciplinary audience of scholars and students, including geographers, political scientists, anthropologists, sociologists, historians, international relations and law experts, as well as lay readers interested in understanding current events.

Stars and Masculinities in Contemporary Italian Cinema Catherine O'Rawe 2014-06-18 In 2005 Michele Placido's *Romanzo criminale* showcased to an international audience a generation of stars (Riccardo Scamarcio, Kim Rossi Stuart, Pierfrancesco Favino, Elio Germano, Stefano Accorsi and Claudio Santamaria). The film foregrounded many of the features of current Italian cinema production: its emphasis on homosocial bonding, particularly its turning towards the contested period of 1970s terrorism, and its use of charismatic male performers working together repeatedly. *Stars and Masculinities in Contemporary Italian Cinema* is the first book to explore contemporary male stars and cinematic constructions of masculinity in Italy, uniting star analysis with

detailed consideration of the masculinities that are dominating current Italian cinematic output. Focusing on star bodies and performance styles, this book argues, however, that we can read a palpable anxiety regarding contemporary Italian masculinity, which is seen as constantly vulnerable.

The Deeds of the Divine Augustus Augustus 2017-04-24 *Res Gestae Divi Augusti* (Eng. *The Deeds of the Divine Augustus*) is the funerary inscription of the first Roman emperor, Augustus, giving a first-person record of his life and accomplishments. The *Res Gestae* is especially significant because it gives an insight into the image Augustus portrayed to the Roman people. Various inscriptions of the *Res Gestae* have been found scattered across the former Roman Empire. The inscription itself is a monument to the establishment of the Julio-Claudian dynasty that was to follow Augustus. The text consists of a short introduction, 35 body paragraphs, and a posthumous addendum. These paragraphs are conventionally grouped in four sections, political career, public benefactions, military accomplishments and a political statement. The first section (paragraphs 2-14) is concerned with Augustus' political career; it records the offices and political honours that he held. Augustus also lists numerous offices he refused to take and privileges he refused to be awarded. The second section (paragraphs 15-24) lists Augustus' donations of money, land and grain to the citizens of Italy and his soldiers, as well as the public works and gladiatorial spectacles that he commissioned. The text is careful to point out that all this was paid for out of Augustus' own funds. The third section (paragraphs 25-33) describes his military deeds and how he established alliances with other nations during his reign. Finally the fourth section (paragraphs 34-35) consists of a statement of the Romans' approval for the reign and deeds of Augustus. The appendix is written in the third person, and likely not by Augustus himself. It summarizes the entire text, and lists various buildings he renovated or constructed; it states that Augustus spent 600 million silver denarii (i.e. 600,000 gold denarii) from his own funds during his reign on public projects. Ancient currencies cannot be reliably converted into modern equivalents, but it is clearly more than anyone else in the Empire could afford. Augustus consolidated his hold on power by reversing the prior tax policy beginning with funding the *aerarium militare* with 170 million sesterces of his own money.

Aristotle as Teacher Christopher Bruell 2014 This book is an account of Aristotle's *Metaphysics*. The work is considered as a whole and each of its parts or books is taken up in the order that it has in the traditional text. The book is based on an examination of all of the manuscript readings reported in the three most recent editions of the work (those of Christ, Ross, and Jaeger), and it attempts in this way and others to come as close as possible to what would have been the original text. The *Metaphysics* is of course a much-studied work. What distinguishes this new effort to understand it is the working assumption that Aristotle presents in it his most comprehensive reflection on science: its character and aims, its foundations or presuppositions, and the obstacles or objections that constitute a challenge to its possibility.--

Integrated Management of Arthropod Pests and Insect Borne Diseases Aurelio Ciancio 2010-06-16 This is the last volume of the IPMD series. It aims, in a multi-disciplinary approach, at reviewing and discussing recent advances and achievements in the practice of crop protection and integrated pest and disease management. This last effort deals with management of arthropods, and is organized with a first section on biological control in citrus orchards, a second one on advanced and integrated technologies for insect pest management and a last section, dealing with mites and their biological control. A wide and exhaustive literature already covers several aspects of chemical or biological control of insects and mites, but there is still a need for a more holistic vision of management, accounting for different problems and solutions, as they are applied or developed, in different regions and cropping systems, worldwide. In this series we attempted to fill this gap, providing an informative coverage for a broad range of agricultural systems and situations.

Motherhood and the Other Antony Augoustakis 2010-07-22 This is the first book-length study to reconstruct the role of women in the epic poems of the Flavian period of Latin literature. Antony Augoustakis examines the role of female characters from the perspective of Julia Kristeva's theories on foreign otherness and motherhood to underscore the on-going negotiation between same and other in the Roman literary imagination as a telling reflection on the construction of Roman identity and of gender and cultural hierarchies.

Bridges to Scandinavia Andrea Meregalli 2020-01-15 This volume is the final output of a project started in 2013 on the occasion of the fortieth anniversary of the Scandinavian Section of the University of Milan. A group of scholars working on different European and non-European cultural and literary traditions come together here to discuss the relationships between their areas of study and the Nordic countries. The range of the contributions expands over time and space, from the Middle Ages to the present day, from Poland in the east to the United States in the west, across various European countries. Through various kinds of expertise and different perspectives, this intercultural discourse deals with diverse themes, including the perception of Nordic culture(s) by foreign writers as well as the image of other cultures in Scandinavian works. In particular, the literary and cultural interchange of models and ideas between the North and other areas is investigated in a number of essays devoted to numerous authors, including, among others, Klaus Bödl, Carmen de Burgos, Carlo Emilio Gadda, Gerhart Hauptmann, Henrik Ibsen, Stieg Larsson, Carl von Linné, Rainer Maria Rilke, J.D. Salinger, Henryk Sienkiewicz, Mme de Staël, August Strindberg, and Tomas Tranströmer.

But Will the Planet Notice? Gernot Wagner 2011-09-27 You are one of seven billion people on Earth. Whatever you or I do personally—eat tofu in a Hummer or hamburgers in a Prius—the planet doesn't notice. In our confrontation with climate change, species preservation, and a planet going off the cliff, it is what several billion people do that makes a difference. The solution? It isn't science, politics, or activism. It's smarter economics. The hope of mankind, and indeed of every living thing on the planet, is now in the hands of the dismal science. Fortunately, we've been there before. Economists helped crack the acid rain problem in the 1990's (admittedly with a strong assist from a phalanx of lawyers and activists). Economists have helped get lead out of our gas, and they can explain why lobsters haven't disappeared off the coast of New England but tuna is on the verge of extinction. More disquietingly, they can take the lessons of the financial crisis and model with greater accuracy than anyone else the likelihood of environmental catastrophe, and they can help save us from global

warming, if only we let them.

Agamben and the Signature of Astrology Paul Colilli 2015-10-16 The work of Giorgio Agamben, one of the world's most important living philosophers, has been the object of much scrutiny. Yet, there is one dimension of his thought that remains unexamined by scholars: the presence of the ancient science of astrology in his writings. This book, the first of its kind, identifies the astrological elements and explains the implications of their usage by Agamben. In so doing, this study challenges us to imagine Agamben's thought in a radically new light. A critical account of the presence of astrology and related themes in Agamben's writings, ranging from the earlier works to the more recent publications, illustrates that the astrological signature constitutes a mode of philosophical archaeology that allows for an enhanced understanding of concepts that are central to his works, such as potentiality, the signature, bare life and biopolitics.

Breathe Belisa Lozano-Vranich 2014-02-14 Using straightforward jargon-free language, BREATHE presents Dr. Belisa's unique approach to breathing exercises. It is a book for people who are looking to address their fatigue, sleeping problems, anxiety, and stress - all of which are worsened by shallow, erratic inefficient breaths and, consequently, suboptimal oxygenation of the body and brain at a cellular level. In addition, the exercises and theory taught in BREATHE will result in better endurance in sports. You'll be taking care of yourself from the inside out. Dr. Belisa's method teaches you to relearn or remember how you used to breathe rather than teach you a skill requiring the attention and motivation that it takes to acquire a new habit. Dr. Belisa asks you put aside ten minutes a day for fourteen days, working from your baseline, and pushing yourself just as you would in a gym or in physical therapy. The result: more energy, less pain, lower cortisol (and control of belly fat), less GI problems, and a better immune system. The explosion of technology, longer hours spent seated at a desk or car, and high levels of daily stress everyone accepts as normal have had a tremendous effect on the way people breathe. This in turn has created or exacerbated medical problems such as high blood pressure, irritable bowel, and insomnia. BREATHE is a primer that covers all the critical core issues related to oxygen, your lungs, and your breathing patterns. It teaches you how to breathe in an anatomically congruous way that maximizes inhaled and exhaled, lung expansion, and ribcage flexibility. Finally, BREATHE is perfect for someone wanting to explore concepts of mindfulness and meditation. If you are looking to improve such brain functions as focusing and problem solving, or if you just want to relax and rejuvenate by quickly ridding yourself of oxidative stress of the day, this book is for you.

Alone Cyn Balog 2017-11-07 This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means

they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Buddha at Bedtime Dharmachari Nagaraja 2010-01-01 Building on the age-old art of storytelling, this beautiful book retells 20 ancient Buddhist tales in a way that will aid relaxation and prepare your child for sleep.

Millionaire by Thirty Douglas R. Andrew 2008-04-30 Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Fascism in Italian Cinema since 1945 G. Lichtner 2013-05-29 From neorealism's resolve to Berlusconi revisionist melodramas, this book examines cinema's role in constructing memories of Fascist Italy. Italian cinema has both reflected and shaped popular perceptions of Fascism, reinforcing or challenging stereotypes, remembering selectively and silently forgetting the most shameful pages of Italy's history.

Gender based violence in university communities Anitha, Sundari 2018-06-27 Until recently, higher education in the UK has largely failed to recognise gender-based violence (GBV) on campus, but following the UK government task force set up in 2015, universities are becoming more aware of the issue. And recent cases in the media about the sexualised abuse of power in institutions such as universities, Parliament and Hollywood highlight the prevalence and damaging impact of GBV. In this book, academics and practitioners provide the first in-depth overview of research and practice in GBV in universities. They set out the international context of ideologies, politics and institutional structures that underlie responses to GBV in elsewhere in Europe, in the US, and in Australia, and consider the implications of implementing related policy and practice. Presenting examples of innovative British approaches to engagement with the

issue, the book also considers UK, EU and UN legislation to give an international perspective, making it of direct use to discussions of 'what works' in preventing GBV.

Boyfriends with Girlfriends Alex Sanchez 2011-04-19 Sergio is bisexual, but his only real relationship was with a girl. Lance has always known he was gay, but he's never had a real boyfriend. When the two of them meet, they have an instant connection—but will it be enough to overcome their differences? Allie's been in a relationship with a guy for the last two years—but when she meets Kimiko, she can't get her out of her mind. Does this mean she's gay? Or bi? Kimiko, falling hard for Allie, is willing to stick around and help Allie figure it out. *Boyfriends with Girlfriends* is Alex Sanchez at his best, writing with a sensitive hand to portray four very real teens striving to find their places in the world—and with each other.

Surgical English Ramón Ribes 2010-01-12 Surgeons around the world need a basic knowledge of English to keep up to date with advances in their field. Fluency in surgical English is important for your professional development, enabling you to attend English-speaking patients with confidence, to study (or work) in other hospitals, speak confidently at international meetings, and to write articles for international journals. This book will provide you with the basic tools to handle day-to-day situations without stress and will help you to improve your English, no matter what your level. To our knowledge, this is the first English book written specifically by surgeons for surgeons. We are sure that surgical specialists from all over the "non-English-speaking world" (general surgeons, thoracic surgeons, vascular surgeons, neurosurgeons, gynecologists, plastic surgeons) will enjoy reading it.

Rethinking Biomedicine and Governance in Africa P. Wenzel Geißler 2014-03-31 In the domain of health, the relation between bodies, citizenship, nations and governments has changed beyond recognition over the past four decades, especially in Africa. In many regions, populations are now faced with a total lack of medical care, and the disciplinary regimes of modernity are faint memories. In this situation, new critical insights beyond the critique of old »modernization« and the »disciplinary regimes« of imperial times are needed. How can we keep up our sophisticated criticism of knowledge regimes and our doubts with regard to narratives of development, when so many people in Africa are dreaming about modernity and are envisioning their own renaissance?

Masculinity Studies & Feminist Theory Judith Kegan Gardiner 2002 Looking at literature, film and classroom practices the authors examine the ways male privilege and power are constituted and represented, and the effect of such constructions on men and women. The volume addresses questions as: Why is there so much talk of a 'crisis' in masculinity? How have ideas of manhood been transformed by feminism?

Italian Philosophy of Technology Simona Chiodo 2020-12-20 This is the first volume about the Italian philosophy of technology written in English and including novel and translated contributions. The volume presents original research on emerging topics in the field, as well as an overview of the most distinguished Italian approaches to the philosophy of technology. While offering both historical and political perspectives and the contributions of the philosophy of law, philosophy of science, and aesthetics, *Italian Philosophy of Technology* promotes a novel view on the intersection between

continental and analytic traditions in the philosophy of technology.

Alien Terrestrial Arthropods of Europe Alain Roques 2010 This book provides the first comprehensive review of the fauna of alien terrestrial arthropods that have colonized the European continent and its associated islands. Directly ensuing from the DAISIE project, this is the result of the joint work of 89 authors from 27 different European countries. The book summarizes present knowledge of the arthropod invasion process, from temporal trends and biogeographic patterns, to pathways and vectors, invaded habitats, and ecological and economical impacts. A total of 1590 species alien to Europe, including crustaceans, myriapods, mites, spiders, and insects, are listed in two volumes and 21 separate chapters that detail the different taxonomic groups. For each species, all key information - feeding regime, date and country of first record in Europe, invaded countries, invaded habitats, plant or animal host - is supplied. More detailed factsheets are provided for the 80 species considered to be most representative of the different pathways of introduction and of the diversity of impacts on ecosystems, economic activities and human and animal health.
