Me We Do Be Randall Bell 2017-03-14 What is a winning strategy? Why do some people, families, and organizations take a dive, some merely survive, while others thrive? What leads up to a disaster or collapse? Why do some squander success, while others continue to elevate? How do we build a solid foundation that assures solid, authentic growth? Me We Do Be is the result of research that has spanned twenty-five years at the intersection of sociology and economics. Specifically, I have explored what behaviors lead to disaster, recovery, or prosperity. As an economist, I measure the financial effects caused by disasters and other detrimental conditions. In other words, when disaster strikes, I am often called in to compute the business and real estate damages. Appraisers measure value, but I measure the loss of value. Moreover, also being a sociologist, I keep my eye on the people behind the statistics as I develop the strategies to move forward. It is a narrow consulting niche involving research, valuation, negotiation, and strategy, and it has provided unique access to interesting people and places around the globe. The journey began in the 1980s when I was a graduate student at UCLA studying leadership and business models. In the 1990s, I directed a national practice at the world's largest consulting firm. My research expanded as I walked the reactors at Chernobyl and cut through the jungles around the Bikini Atoll

radioactive nuclear test sites. I have worked on cases ranging from the O. J. Simpson and JonBenet Ramsey crime scenes to the bizarre Heaven's Gate Cult mass-suicide mansion. In the 2000s, there was more. I was stunned as I stood on a curb in New York and watched smoke billowing from the World Trade Center and picked up debris on a rural field in Pennsylvania where Flight 93 had crashed on 9-11. I walked the beaches stained by the BP Oil Spill and inspected thousands of homes torn apart by Hurricane Katrina. As a socio-economist I have worked on these and hundreds of other cases around the world. More importantly, I have studied their ultimate resolution. While some reporters drop in and rush off to the next story, I have stayed to talk to the people long after the news vans drive away. Furthermore, I have been an adviser in countless boardrooms where we discussed cases involving billions of dollars. A crisis exposes a person's or organization's true character, and this yields some invaluable insights. In all, I had accumulated a mountain of information and I wanted to organize it within a practical framework. My objective was to find a model that children could understand and that a CEO would take seriously. I considered using the ancient Greek paradigm of "ethos, pathos, and logos" and a more modern framework of "mental, social, spiritual, and physical." Of course, there was the standard, "mind, body, and soul," as well as many other models. All of these struck me as good, but none of them struck me as complete. It was as if they were playing some of the keys of the piano, but not the whole keyboard. I simply wanted a clear, complete framework. My quest for the ideal model ultimately came to me on the Marianas Islands as I sat in deep thought for three consecutive days. The answer was simple: Just as all great structures have four cornerstones, there are four cornerstones of all great pursuits. These can be summed up as Me We Do Be. Me refers to habits that build quality thinking and wisdom, We habits build relationships, Do habits build productivity, and Be habits build the future. In the pages that follow, I will use this Me We Do Be framework as we explore some of the most fascinating places on Earth, learn from the experiences of some extraordinary people, and look at classic behavioral research. This is all set out within the four Me We Do Be sections, twenty-one short chapters, and about one hundred individual lessons. The objective of each lesson is to encourage discussion on essential life skills. On top of that, more than five thousand people from all fifty states, Australia, and the United Kingdom participated in our Rich Habits Survey.¹ Here, my research staff and I surveyed professionals, students, stay-at-home moms, retirees, the unemployed, and multi-millionaires. We studied dozens of rituals ranging from writing thank-you notes to eating together as a family. We then statistically correlated various habits with different measures of success such as education, wealth, quality relationships, and an overall sense of happiness. Obviously, some people define success as making money. I joke that money doesn't make anyone happy, but it's a great way to be miserable! However, some might define success as a happy family life, finding true love, or winning a competition. Some see success as contributing to a worthy cause, completing a degree, or mastering a musical instrument. Others view success as healing from an emotional wound, beating cancer, or connecting with the divine. Some see success as being a leader or building a huge name for themselves, while others just want the satisfaction of quietly doing great work. Many define success as a combination of things. I respect the perception that there is no one-size-fits-all for success. Here, we define what success means to us individually, but in so doing, we will look at the foundational elements that apply to us all. The research and science is clear: however you define "success," daily habits, rituals, and routines are the key to either tragedy or triumph. Just as one bad habit ripples out until a life is destroyed, it is also true that one new good habit can ripple out and create something magnificent. Today's habits, rituals, and routines are tomorrow's destiny, and minor adjustments bring major rewards. Indeed, the four cornerstones of Me We Do Be lay the foundation of every great pursuit. They bring results that are positive, profound, and permanent. We have absolutely no control over most things, like the weather or the global economy. The only thing we really control is ourselves and the habits we choose. We dictate when we get up, what we eat, what we say and how we think. Focusing on a proven set of rich habits is simply the most direct way to building a rich life.

Mindset Carol S. Dweck 2006-02-28 The updated edition of the bestselling book that has changed millions of lives with its insights into the growth mindset "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, GatesNotes After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

The Dynamics of Opportunity in America Irwin Kirsch 2016-01-22 Across the country, our children are beginning life from very different starting points. Some have aspirations and believe they can be achieved. For too many others, aspirations are tempered, if not dashed, by the sobering realities of everyday life. These different starting points place children on distinctly different trajectories of growth and development, ultimately leading to vastly different adult outcomes. How did we get to a place where circumstances of birth have become so determinative? And what must we do, within communities and across our country, to better equalize opportunity for more Americans – both young and old? The editors of this volume contend that if, as a nation, we do nothing, then we will continue to drift apart, placing an unsustainable strain on the nation's social fabric and the character of its democracy. Consequently, understanding the dynamics governing the distribution and transmission of opportunity – and transforming this understanding into policies and programs – is critical for not only the life outcomes of individual Americans and their children, but also the country as a whole. The goal of Educational Testing Service's Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action – and how best to do so. This volume contains 14 chapters, including an epilogue, written by leaders from a range of fields including education, economics, demography, and political science. Collectively, they not only illuminate key aspects of the problem but also offer suggestions of what policies, programs, and changes in practices could begin to reverse the trends we are seeing. Written in an engaging style, this volume constitutes an essential foundation for informed discussion and strategic analysis.

What School Could Be Ted Dintersmith 2018-04-10 An inspiring account of teachers in ordinary circumstances doing extraordinary things, showing us how to transform education *What School Could Be* offers an inspiring vision of what our teachers and students can accomplish if trusted with the challenge of developing the skills and ways of thinking needed to thrive in a world of dizzying technological change. Innovation expert Ted Dintersmith took an unprecedented trip across America, visiting all fifty states in a single school year. He originally set out to raise awareness about the urgent need to reimagine education to prepare students for a world marked by innovation--but America's teachers one-upped him. All across the country, he met teachers in ordinary settings doing extraordinary things, creating innovative classrooms where children learn deeply and joyously as they gain purpose, agency, essential skillsets and mindsets, and real knowledge. Together, these new ways of teaching and learning offer a vision of what school could be—and a model for transforming schools throughout the United States and beyond. Better yet, teachers and parents don't have to wait for the revolution to come from above. They can readily implement small changes that can make a big difference. America's clock is ticking. Our archaic model of education trains our kids for a world that no longer exists, and accelerating advances in technology are eliminating millions of jobs. But the trailblazing of many American educators gives us reasons for hope. Capturing bold ideas from teachers and classrooms across America, *What School Could Be* provides a realistic and profoundly optimistic roadmap for creating cultures of innovation and real learning in all our schools.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce,

the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
