Teaching in the Cracks Brian D. Schultz 2017 This engaging book shows how teachers and schools are creating emergent, democratic, progressive education amidst the current context of high stakes accountability. In this follow-up to his bestseller, Spectacular Things Happen Along the Way, Schultz explores how today's rhetoric and restrictive mandates result in curriculum that fails to capture the attention of students. For meaningful learning that develops transferable skills and engages students, teachers and sometimes whole schools need to find spaces to "teach in the cracks" so that students can connect with issues relevant to their lives. Teaching in the Cracks provides both a theoretical and practical foundation for incorporating an action-focused curriculum that meets academic standards and provides students with opportunities for agency and to use their voices in their own learning. "Through compelling examples, Brian Schultz shares how educators can help students use their powers."

—From the Foreword by Deborah Meier, teacher, principal, and advocate "This book is an invitation to rethink teaching from top to bottom, to dive into classroom life as a passionate adventure in discovery and surprise." —From the Afterword by William Ayers, education activist "For teachers who genuinely seek to make a difference through their work, this book will be a helpful resource." —Pedro A. Noguera, University of California, Los Angeles

Books, Bytes and Business Bill Martin 2016-04-08 How are businesses responding to global changes in markets driven by changes in technology? Whatever the industry, the trends are familiar: globalization and the rise of industrial conglomerates, mergers and acquisitions, the networking of businesses and markets, outsourcing and shifts in the distribution of resources and production, all reflected in the emergence of new players, new products and services and new forms of competition. As arguably the first knowledge-based business, book publishing provides an ideal setting for the study of challenge and opportunity. The industry is currently experiencing fierce levels of competition, extreme financial pressures, restructuring and the threat of technology-induced obsolescence. Added to these are the challenges posed by new and potential entrants to the market, the emergence of new products and services, new ways of doing business, including trading in virtual markets, and the vulnerability of traditional business models. The suitability of book publishing as a context for researching the emergence of knowledge-based business becomes all too apparent. Through combining primary research with secondary analysis drawn from the relevant literatures, Books, Bytes and Business is both a readable and informative account of business in the knowledge-based economy.

An opthamologist and optometrist are the highest grade of eye technician, doing surgery, removing cataracts, certified to use the excimer laser to cure nearsightedness, etc. One step below that is the optician, the eye technicians who takes eye tests and fits you for glasses and contact lenses among other things. Optometrists diagnose, manage, and treat basic conditions and diseases of the human eye. Their practice consists of eye examinations, diagnosis of problems, and the prescription of corrective lenses. Dispensing opticians fill the prescription that is written by an optometrist. They design, measure, fit and help select frames for their patients. An ophthalmologist is a physician who diagnoses and treats eye diseases.
