Abode Serena Mitnik-Miller 2019-04-16 Create your space with simplicity, tranquility, and beautifully minimalist style. The yearning for a life of pared-down purity has built to a roar, and Serena Mitnik-Miller and Mason St. Peter—the husband-and-wife owners of General Store, one of California’s most talked-about shops—are at the forefront. In Abode: Thoughtful Living with Less, these tastemakers make a graceful case for living better no matter your budget or abilities, guiding you to create a space this is simple and true. Their time-tested methods create interiors that maximize openness, strip a building back to its bones, and amplify natural light, evoking unpretentious tranquility. The blueprint for their signature aesthetic is all here: the embrace of elemental materials, curation of handcrafted objects, and collection of furnishings from eras when craftsmanship was king. This selection of Mitnik-Miller and St. Peter’s greatest collaborations will take you through their breathtaking rooms, masterpieces of warm minimalism. Abode is a glimpse into the couple’s process and a guide to manifesting your own beautiful interiors.

Mindfulness Mark Williams 2011-05-05 THE LIFE-CHANGING BESTSELLER - OVER 1.5 MILLION COPIES SOLD 'A deeply

compassionate guide to self-care - simple and profound' Sir Kenneth Branagh 'If you want to free yourself from anxiety and stress, and feel truly at ease with yourself, then read this book' Ruby Wax Authoritative, beautifully written and much-loved by its readers, Mindfulness: A practical guide to finding peace in a frantic world has become a word-of-mouth bestseller and global phenomenon. It reveals a set of simple yet powerful practices that you can incorporate into daily life to break the cycle of anxiety, stress unhappiness and exhaustion. It promotes the kind of happiness that gets into your bones and allows you to meet the worst that life throws at you with new courage. Mindfulness is based on mindfulness-based cognitive therapy (MBCT). Co-developed by Professor Mark Williams of Oxford University, MBCT is recommended by the UK's National Institute for Health and Care Excellence and is as effective as drugs for preventing depression. But, equally, it works for the rest of us who aren't depressed but who are struggling to keep up with the relentless demands of the modern world. By investing just a few minutes each day, this classic guide to mindfulness will put you back in control of your life once again.

Cottage Gardens Claire Masset 2020-05-01 A celebration of a beloved and uniquely British garden style. The cottage garden's abundant, informal style is rooted in Victorian dreams of a perfect country life. But it has found new expressions from the Arts & Crafts movement to the present day. This book showcases a selection of National Trust cottage gardens, famous and obscure, including writer Thomas Hardy's cottage in Dorset; the flower-filled cottage garden created at Sissinghurst, Kent, by Vita Sackville-West and Harold Nicolson; the Tudor manor Cothele in Cornwall, Beatrix Potter's Cumbrian home, Hill Top, and the picturesque Alfriston Clergy House in East Sussex. Cottage Gardens also features some of the most famous non-National Trust examples from around the country, including Kelmscott Manor, Dove Cottage and Eastgrove Cottage Garden. With practical advice on creating your own cottage garden, including key plants and techniques, this is a wonderful companion for all garden enthusiasts. With climbing roses, bright hollyhocks, pathways edged with honeysuckle, blossom-filled orchards and wildflower meadows, this is the perfect book to capture the idyllic British country garden.

Archist Federico Babina 2016-06-30 * A poster book containing 30 detachable posters made by architect and designer Federico Babina* Each poster is a work of art on its own Archist is a playful interpretation of the expressive language and aesthetics of some of the world's most popular artists. For example, Babina tried to imagine what a house designed by Dalí or a museum conceived by Miró would look like. The illustrations represent an imaginary and imagined world of shapes. Federico Babina finds great pleasure in imagining architecture designed and constructed through the interpretation of an artist's language. The book shows that there is a symbiotic relationship and implicit partnership between architecture and art. A sculpture is like micro-architecture, a facade can become like a painted canvas and a building can look like it was shaped by a skilled sculptor. The posters in the book manage to catch the essence of the oeuvre of the artists in question. As a consequence, the posters are much more than mere decoration; they become a playful piece of art history. Federico Babina is an Italian architect and graphic designer who lives and works in Barcelona. He tries to rediscover the world through the eyes of a child: spontaneously, uninhibited and without being conditioned by experience. Federico Babina expresses himself through different techniques, styles

and shapes. He likes the richness of language and the diversity of its forms. Drawing and illustrating allow him to describe and visualize his thoughts, feelings and emotions. Every image tells a story, every image is a story's witness.

Entrepreneurship John R. Bessant 2018-05-29 TRY (FREE for 14 days), OR RENT this title: www.wileystudentchoice.com

Successful entrepreneurship requires a specialized mix of innovation, drive, business acumen, and communication; an entrepreneur sees the potential and pitfalls in any idea, and understands the product, the market, and the business climate well enough to make smart decisions for the venture. This book is designed to go beyond the nuts and bolts of entrepreneurship and help students develop the critical foundation referred to as "entrepreneurial thinking." Organized to align with the typical flow of development, the text allows students to develop their own ideas alongside each lesson. Coverage of goals, opportunities, and resources includes detailed discussion of venture funding, financial resources, and the relationships needed to get an idea off of the ground; subsequent chapters include clear guidance on keeping the momentum going through product development, enterprise growth, value creation, and the evolution of the business model. Based on the latest research and providing a truly global perspective, this book gives students a comprehensive, real-world foundation in entrepreneurship today.

The Castle on the Hudson Renato Cantore 2017-07-25T00:00:00+02:00 Charles Paterno was seven when he left Castelmezzano, a small mountain town in Basilicata to set sail on one of the rattletrap ships headed to America. Thirty years later he was one of the top builders in New York City, among the first to construct the skyscrapers that would form the world's most famous skyline. Intelligence, brilliance, intuition and an ability to stay ahead of the times made him a leading figure in the life of Manhattan. He created garden communities, focused on new technologies and turned to the best architects. Paterno didn't just want to offer houses, but new lifestyles to tens of thousands of people. His first American dream looked like a white castle at the northernmost tip of Manhattan, where he lived for years with his wife and son, surrounded by a small but very loyal retinue. A friend of Giuseppe Prezzolini, he donated a library of 20,000 books, the Paterno Library, to the Casa Italiana at Columbia University. Fiorello La Guardia, the Italian-American mayor of New York City, called him a genius. Born into poverty, Paterno died a wealthy man on the green of the most exclusive country club in Westchester.

Labics - Structures Maria Claudia Clemente 2019-03-15 Labics is a rising Rome-based architectural firm that has gained great international acclaim in recent years for both its projects and its submissions to major competitions. Its guiding principle is the idea of "structure." Each of the firm's projects--which range from housing and office buildings to museums, cultural centers, schools, subway stations, and public spaces--is intended to exemplify the importance of the respective type of structure. Labics--

Structures is the first book on Labics's remarkable and rapidly growing body of work. The book is arranged in four chapters that explore the idea of structure in different contexts: "Geometric," "Bearing," "Circulation," and "Public Space Structures." Alongside topical essays, it features twenty projects selected by the firm's founding directors, Maria Claudia Clemente and Francesco Isidori, to represent the diversity of the firm's work, as well as its wide geographic reach--with buildings in Italy, Finland, Switzerland, England, Bosnia and Herzegovina, Saudi Arabia, and Iran. Each project is documented with atmospheric photographs and a wealth of plans and diagrams to illustrate concepts and details.

Monsanto Jim Gerritsen 2017-10-18 As a manufacturer of food and animal feed, seeds and chemical products, Monsanto is relentlessly developing and marketing new technologies. The monopoly it has arguably secured by dubious means bears no relation to its negligence with regard to potential risks. Particularly in light of the devastating consequences that are still causing suffering to people and the environment in many places, the company's self-portrayal as a forward-looking, omnipotent force for good seems cynical. The photographer Mathieu Asselin, who lives in France and Venezuela, has tried his hand at the daunting task of exploring the issues surrounding Monsanto. His investigative photographic study manages to capture the complexity of this topic, creating links between past, present and future and illuminating many different aspects from a variety of perspectives.

Manitvana Wu Ming 2010-06-14 1775—The conflict between the British Empire and the American colonies erupts in all-out war.

Rebels and loyalists to the British Crown compete for an alliance with the Six Nations of the Iroquois, the most powerful Indian confederation, boasting a constitution hundreds of years old. In the Mohawk River Valley, Native Americans and colonists have co-existed for generations. But as the thunder of war approaches and the United States struggles violently into existence, old bonds are broken, friends and families are split by betrayal, and this mixed community is riven by hatred and resentment. To save his threatened world, the Mohawk war chief Joseph Brant sets off in a restless journey that will take him from New York to the salons of Georgian London at the heart of the British Empire.

Urban Memory Mark Crinson 2005-09-21 Nine previously unpublished essays form an interdisciplinary assessment of urban memory in the modern city, analysing this burgeoning area of interest from the perspectives of sociology, architectural and art history, psychoanalysis, culture and critical theory. Featuring a wealth of illustrations, images, maps and specially commissioned artwork, this work applies a critical and creative approach to existing theories of urban memory, and examines how these ideas are actualised in the forms of the built environment in the modernist and post-industrial city. A particular area of focus is post-industrial Manchester, but the book also includes studies of current-day Singapore, New York after 9/11, modern museums in industrial gallery spaces, the writings of Paul Auster and W.G. Sebald, memorials built in concrete, and contemporary art.

Drama and Digital Arts Cultures David Cameron 2017-06-29 Drama and Digital Arts Cultures is a critical guide to the new forms of playful exploration, co-creativity, and improvised performance made possible by digital networked media. Drawing on examples from games, education, online media, technology-enabled performance and the creative industries, the book uses the elements of applied drama to frame our understanding of digital cultures. Exploring the connected real-world and virtual spaces where young people are making and sharing digital content, it draws attention to the fundamental applied drama conventions that infuse and activate this networked culture. Challenging descriptions of drama and digital technology as binary opposites, the book maps common principles and practice grounded in role, embodiment, performance, play, and identity that are being amplified and enhanced by the affordances of online media. Drama and Digital Arts Cultures draws together extensive original research including interviews with game designers, media producers, educators, artists and makers at the heart of these new digital cultures. Young people discuss their own creative practices and products, providing insight into a complex and evolving world being transformed by digital technologies. A practical guide to the field, it contains case studies and examples of the intersections of drama conventions and networked cultures drawn from the US, Canada, UK, Netherlands, Singapore and Australia. Written for scholars, educators, students and 'makers' everywhere, Drama and Digital Arts Cultures provides a clear understanding of how young people are blending creativity and learning with the powerful and empowering conventions of drama to create new forms of multimodal and transmedia storytelling.

LOT-EK Ada Tolla 2017-08-29 LOT-EK is a design practice that believes in being unoriginal, ugly, and cheap. Also in being

revolutionary, gorgeous, and completely luxurious. LOT-EK's work reveals extraordinary transformations of ordinary things—from their famous shipping container projects onward—combining maker culture and hacker culture into beautiful and radical visions for sustainable and meaningful living. LOT-EK: Objects + Operations surveys dozens of projects—built, unbuilt and in-progress; polemical, practical, and in-between—complemented by photographs from LOT-EK's multi-year URBAN SCAN project, a vast photographic document of infrastructure and incident, as well as essays by Thomas de Monchaux and interviews with founding partners Ada Tolla and Giuseppe Lignano.

Aesthetics and Technology in Building Pier Luigi Nervi 1965 Here is a verbal and pictorial illustration of the credo that has guided one of the world's most distinguished architects throughout his career. "Architecture is, and must be, a synthesis of technology and art." Using nearly 200 drawings and photographs, including plans, interesting details, various stages of construction, and both interior and exterior views of some of his major works, Mr. Nervi shows how his philosophy is put into practice. Referring to most of his important projects, he discusses solutions to various functional and construction requirements where he used precast and cast-in-place concrete, emphasizing the richness of this material. Mr. Nervi stresses the advantages of reinforced concrete, which, he says, allows greater flexibility and makes it easier to satisfy his triple demand of economy, technical correctness, and aesthetic satisfaction. In predicting the future of architecture he stresses the necessity of architectural solutions that are functionally and technically sound. His final remarks concern his ideas about the proper course of study for architecture students, training that will produce architects with a "far greater technical sense than in the past, a technical sense which results in a constant search for economic efficiency."

Environmental Indicators 1991
