But Will the Planet Notice? Gernot Wagner 2011-09-27 You are one of seven billion people on Earth. Whatever you or I do personally—eat tofu in a Hummer or hamburgers in a Prius—the planet doesn't notice. In our confrontation with climate change, species preservation, and a planet going off the cliff, it is what several billion people do that makes a difference. The solution? It isn't science, politics, or activism. It's smarter economics. The hope of mankind, and indeed of every living thing on the planet, is now in the hands

of the dismal science. Fortunately, we've been there before. Economists helped crack the acid rain problem in the 1990's (admittedly with a strong assist from a phalanx of lawyers and activists). Economists have helped get lead out of our gas, and they can explain why lobsters haven't disappeared off the coast of New England but tuna is on the verge of extinction. More disquietingly, they can take the lessons of the financial crisis and model with greater accuracy than anyone else the likelihood of environmental catastrophe, and they can help save us from global warming, if only we let them.

Breathe Belisa Lozano-Vranich 2014-02-14 Using straightforward jargon-free language, BREATHE presents Dr. Belisa's unique approach to breathing exercises. It is a book for people who are looking to address their fatigue, sleeping problems, anxiety, and stress - all of which are worsened by shallow, erratic inefficient breaths and, consequently, suboptimal oxygenation of the body and brain at a cellular level. In addition, the exercises and theory taught in BREATHE will result in better endurance in sports. You'll be taking care of yourself from the inside out. Dr. Belisa's method teaches you to relearn or remember how you used to breathe rather than teach you a skill requiring the attention and motivation that it takes to acquire a new habit. Dr. Belisa asks you put aside ten minutes a day for fourteen days, working from your baseline, and pushing yourself just as you would in a gym or in physical therapy. The result: more energy, less pain, lower cortisol (and control of belly fat), less GI problems, and a better immune system. The explosion of technology, longer hours spent seated at a desk or car, and high levels of daily stress everyone

accepts as normal have had a tremendous effect on the way people breathe. This in turn has created or exacerbated medical problems such as high blood pressure, irritable bowel, and insomnia. BREATHE is a primer that covers all the critical core issues related to oxygen, your lungs, and your breathing patterns. It teaches you how to breathe in an anatomically congruous way that maximizes inhales and exhales, lung expansion, and ribcage flexibility. Finally, BREATHE is perfect for someone wanting to explore concepts of mindfulness and meditation. If you are looking to improve such brain functions as focusing and problem solving, or if you just want to relax and rejuvenate by quickly ridding yourself of oxidative stress of the day, this book is for you.

A House to Remember Edna Gammon 2011-10-10 What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers

were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

The Blue Notebook Emmanuil Kazakevich 2002-12-01 Many writers and artists have undertaken the difficult task of recreating the image of Lenin for their contemporaries and future generations. The Blue Notebook by the well-known Soviet author Emmanuil Kazakevich (1913-1962) has become one of the most popular books about Lenin. A notebook in a blue cover actually did exist. In it Lenin jotted down notes for his famous book State and Revolution which he worked on in the difficult days preceding the Great October Socialist Revolution. At the time Lenin was in hiding at Razliv Station, from where he directed the preparations for the armed uprising. "He was a passionate traveler,

a hunter, a crack shot, a top-notch driver, the life of the party, witty and full of fun... Moreover, he was a truly courageous soldier." This portrait of Kazakevich was drawn by his contemporary and colleague, the writer Alexander Tvardovsky. During the Second World War Kazakevich, commander of a platoon, was asked to join the staff of the brigade newspaper. After working on the paper for a short while he asked to be transferred back to the front lines. "The front lines are important to me not only as a patriot, but as a writer, " he said. Emmanuil Kazakevich was born in the Ukraine in 1913, the son of a teacher. His first book, a volume of poetry, was published in 1932. He translated the works of Pushkin, Lermontov, and Mayakovsky into Yiddish. Kazakevich's first prose work, *The Star*, is a harsh, yet sensitive war story which gained him world fame. This was followed by *Spring on the Oder*, *Heart of a Friend*, *Two in the Steppe*, *The House on the Square*, *By the Light of Day* and *The Blue Notebook*, the author's last work. Kazakevich was twice awarded the State Prize for Literature.
