Writing a Watertight Thesis Mike Bottery 2019-05-02 Writing a doctoral thesis can be an arduous and confusing process. This book provides a clear framework for developing a sound structure for your thesis, using a simple approach to make it watertight, defensible and clear. Bottery and Wright draw on their extensive experience of supervising and examining numerous doctorates from an internationally diverse and multicultural student body both in the UK and overseas, and include examples of how successful theses have been made watertight along with exercises to enable readers to do the same thing to their own thesis. The authors demonstrate how the key to making a thesis watertight lies in selecting the central research question and the sub-research questions that together collectively answer this main one. If these questions are well formulated the thesis can be defended successfully against criticism on structural grounds – a major part of the battle. Including chapters on the viva process, strength-testing your thesis and essential preparation for writing up your research, this is the resource for anyone looking to produce a well-structured, watertight piece of research.

The Cambridge Companion to Medieval English Mysticism Samuel Fanous 2011-05-12 The widespread view that 'mystical' activity in the Middle Ages was a rarefied enterprise of a privileged spiritual elite has led to isolation of the medieval 'mystics' into a separate, narrowly defined category. Taking the opposite view, this book shows how individual mystical experience, such as those recorded by Julian of Norwich and Margery Kempe, is rooted in, nourished and framed by the richly distinctive spiritual contexts of the period. Arranged by sections corresponding to historical developments, it explores the primary vernacular texts, their authors, and the contexts that formed the expression and exploration of mystical

experiences in medieval England. This is an excellent, insightful introduction to medieval English mystical texts, their authors, readers and communities. Featuring a guide to further reading and a chronology, the Companion offers an accessible overview for students of literature, history and theology.

A Guide to Formulation and Application of Low-Surfactant Microemulsions in Cleaning-Processes Anna Klemmer 2014-12-17 Surfactants were and still are our inconspicuous companions at macroscopic but more often at microscopic scale. Many technologies are only possible due to surfactant applications, which are of constantly growing scientific and industrial interest for approximately 100 years [1]. Hence, since its definition 'micro emulsion' by Schulman [2] optically isotropic surfactant formulations and their variations have become a significant part in today's society. In nowadays' most popular sector of nanomaterials surfactants are utilised for productions of such via template strategies [3–10]. Organic synthesis benefits from the immensely huge interfacial area of microemulsions resulting in bigger yields which were not possible before [11–21]. Closely related to organic synthesis, pharmaceutical industries enjoy the benefits of drug delivery via e.g. vesicles which play a major role during drug transport into the blood stream [22–27]. Simpler application of surfactants were reported 1984 where cationic surfactants were utilised as stabiliser for antibiotics [28]. Concerning healthier and conscious nutrition microemulsions are applied for reduction of the caloric value of food [29–39]. Also, to contribute to environmental protection exhaust emissions can be reduced by introducing water and surfactants into fuels [40–42]. Surfactant systems or in most cases microemulsions are very adaptable and can therefore be utilised in their most different states. This chapter gives an insightful introduction into the world of microemulsions.

A Social and Religious History of the Jews: High Middle Ages, 500-1200 Salo Wittmayer Baron 1952 This book explores the puzzling phenomenon of new veiling practices among lower middle class women in Cairo, Egypt. Although these women are part of a modernizing middle class, they also voluntarily adopt a traditional symbol of female subordination. How can this paradox be explained? An explanation emerges which reconceptualizes what appears to be reactionary behavior as a new style of political struggle--as accommodating protest. These women, most of them clerical workers in the large government bureaucracy, are ambivalent about working outside the home, considering it a change which brings new burdens as well as some important benefits. At the same time they realize that leaving home and family is creating an intolerable situation of the erosion of their social status and the loss of their traditional identity. The new veiling expresses women's protest against this. MacLeod argues that

the symbolism of the new veiling emerges from this tense subcultural dilemma, involving elements of both resistance and acquiescence.

On Faith, Rationality, and the Other in the Late Middle Ages: Gergely Tibor Bakos 2011-01-01 On Faith, Rationality, and the Other in the Late Middle Ages is an investigation of Nicholas of Cusa that seeks a deeper understanding of this important medieval intellectual and his importance for us today. One of Gergely Bakos's primary aims in this study is to understand Nicholas of Cusa's important and underexamined dimensions of his approach to dialogue with Islam. The framework and the methodology that informs this investigation was inspired by the late Professor Jos Decorte (1954-2001), a Flemish philosopher and mediaevalist at the Catholic University of Leuven in Belgium. Bakos carefully expounds his method of approaching medieval thought (Part One) and then applies and tests this method in practice (Part Two). The most extensive part of this study offers a sketch of the historical background of Nicholas's dialogue with Islam and investigates what possibilities this approach offers. All of this is placed in dialogue with two other mediaeval approaches to Islam (Thomas Aquinas and Ramon Lull). The final chapters discuss Nicholas of Cusa's project from a perspective offered by his mystical theology. The book culminates in an exploration of the possibilities of Nicholas of Cusa's approach by testing the framework of the study. Finally, the author evaluates the application of his own approach (Part Three). The study ultimately has two purposes: to contribute to a better understanding of Nicholas of Cusa's thought, on the one hand, and,

on the other, to test a particular methodology and interpretative framework for the understanding of mediaeval culture.

Sensational Devotion Jill Stevenson 2013-04-15 In *Sensational Devotion*, Jill Stevenson examines a range of evangelical performances, including contemporary Passion plays, biblical theme parks, Holy Land re-creations, creationist museums, and megachurches, to understand how they serve their evangelical audiences while shaping larger cultural and national dialogues. Such performative media support specific theologies and core beliefs by creating sensual, live experiences for believers, but the accessible, familiar forms they take and the pop culture motifs they employ also attract nonbelievers willing to "try out" these genres, even if only for curiosity's sake. This familiarity not only helps these performances achieve their goals, but it also enables them to contribute to public dialogue about the role of religious faith in America. Stevenson shows how these genres are significant and influential cultural products that utilize sophisticated tactics in order to reach large audiences comprised of firm believers, extreme skeptics, and those in between. Using historical research coupled with personal visits to these various venues, the author not only critically examines these spaces and events within their specific religious, cultural, and national contexts, but also places them within a longer devotional tradition in order to suggest how they cultivate religious belief by generating vivid, sensual, affectively oriented, and individualized experiences.

Vernacular Aesthetics in the Later Middle Ages Katharine W. Jager 2019-07-03 *Vernacular Aesthetics in the Later Middle Ages* explores the formal composition, public performance, and popular reception of vernacular poetry, music, and prose within late medieval French and English cultures. This collection of essays considers the extra-literary and extra-textual methods by which vernacular forms and genres were obtained and

examines the roles that performance and orality play in the reception and dissemination of those genres, arguing that late medieval vernacular forms can be used to delineate the interests and perspectives of the subaltern. Via an interdisciplinary approach, contributors use theories of multimodality, translation, manuscript studies, sound studies, gender studies, and activist New Formalism to address how and for whom popular, vernacular medieval forms were made.

The Allure of Battle Cathal J. Nolan 2017-01-10 We tend to measure war's winners and losers in terms of major engagements. Gettysburg, Trafalgar, Midway, Waterloo, Agincourt, Dien Bien Phu - all resonate in the literature of war and in our imaginations as either tide-turning or decisive. But what actually signifies a "decisive" battle? The Allure of Battle by Cathal J. Nolan systematically examines a series of great battles, each traditionally perceived as the "turning point" of the war in which they occurred and shows how and where these battles fit into the histories of those wars, and into military history as a whole. In each case, even large and important battles have only contributed to victory or defeat by accelerating the erosion of the other side's defences. In massive conflicts, a shared characteristic emerges: prolonged stalemate created from an uneven military balance, broken only over time and by a series of smaller engagements. Rather than claim to have discovered linear or universal laws about warfare, or some overarching "theory of war," this book places battles within the context of the wider conflict in which they took place. In the process it help corrects a distorted view of battle's place in war - replacing popular images of the "decisive battle" with somber appreciation of the commitments and human sacrifices made in war. Accessible, provocative, and entertaining, The Allure of Battle will sparks fresh debate about the history, strategy, and conduct of warfare.

Gymnastics of the Mind Raffaella Cribiore 2005-02-13 This book is at once a thorough study of the educational system for the Greeks of Hellenistic and Roman Egypt, and a window to the vast panorama of educational practices in the Greco-Roman world. It describes how people learned, taught, and practiced literate skills, how schools functioned, and what the curriculum comprised. Raffaella Cribiore draws on over 400 papyri, ostraca (sherds of pottery or slices of limestone), and tablets that feature everything from exercises involving letters of the alphabet through rhetorical compositions that represented the work of advanced students. The exceptional wealth of surviving source material renders Egypt an ideal space of reference. The book makes excursions beyond Egypt as well, particularly in the Greek East, by examining the letters of the Antiochene Libanius that are concerned with education. The first part explores the conditions for teaching and learning, and the roles of teachers, parents, and students in education; the second vividly describes the progression from elementary to advanced education. Cribiore examines not only school exercises but also books and commentaries employed in education--an uncharted area of research. This allows the most comprehensive evaluation thus far of the three main stages of a liberal education, from the elementary teacher to the grammarian to the rhetorician. Also addressed, in unprecedented detail, are female education and the role of families in education. *Gymnastics of the Mind* will be an indispensable resource to students and scholars of the ancient world and of the history of education.

The Unknowable God Ignacio L. Götz 2021-03-16 Most contemporary Christians are polytheists. They believe in many gods—unawares, of course. There is a Father-god, depicted old and white-haired; there is a Son-god, middle-aged, identified with Jesus of Nazareth; and there is a Spirit-god, symbolized by a dove. Many artists have depicted this trinity, like El Greco, who painted his "The Trinity" in 1578. These three gods are believed to constitute only one divinity, but very few ordinary Christians could explain how this could be the case. This plurality of gods is the reason why Christianity is reviled by Jews and Muslims who affirm steadfastly the unicity of God and who ban any pictorial representation of the divinity. The very first Christians, the family and friends of Jesus, who were Jews, would not have held such a pagan belief, but their writings were destroyed by later adherents, so we lack the evidence to prove this. Christians claim that the Trinity has been revealed, but the fact is that such revelation is disproved by science and philosophy. So why not transcend this trinity in a contemplation of the One Unknowable God of all?

Why not learn to live without knowing what God is, being satisfied with the belief that God is neither male nor female, neither triad nor monad, but simply the Divine Incognito?

Medieval Foundations of International Relations William Bain 2016-07-15

The purpose of this volume is to explore the medieval inheritance of modern international relations. Recent years have seen a flourishing of work on the history of international political thought, but the bulk of this has focused on the early modern and modern periods, leaving continuities with the medieval world largely ignored. The medieval is often used as a synonym for the barbaric and obsolete, yet this picture does not match that found in relevant work in the history of political thought. The book thus offers a chance to correct this misconception of the evolution of Western international thought, highlighting that the history of international thought should be regarded as an important dimension of thinking about the international and one that should not be consigned to history departments. Questions addressed include: what is the medieval influence on modern conception of rights, law, and community? how have medieval ideas shaped modern conceptions of self-determination, consent, and legitimacy? are there 'medieval' answers to 'modern' questions? is the modern world still working its way through the Middle Ages? to what extent is the 'modern outlook' genuinely secular? is there a 'theology' of international relations? what are the implications of continuity for predominant historical narrative of the emergence and expansion of international society? Medieval and modern are certainly different; however, this collection of essays proceeds from the conviction that the modern world was not built on a new plot with new building materials. Instead, it was constructed out of the rubble, that is, the raw materials, of the Middle Ages. This will be of great interest to students and scholars of IR, IR theory and political theory. .

Sainthood in the Later Middle Ages Andri Vauchez 2005-02-17 This is a standard work of reference for the study of the religious history of western Christianity in the later middle ages which, since its original publication in French in 1981, has come to be regarded as one of the great contributions to medieval studies of recent times. Hagiographical texts and reports of the processes of canonisation - a mode of investigation into saints' lives and their miracles implemented by the popes from the end of the twelfth century - are here used for the first time as major source materials. The book illuminates the main features of the medieval religious mind, and highlights the popes' attempts to gain firmer control over the wide variety of expressions of faith towards the saints in order to promote a higher pattern of devotion and moral behaviour among Christians.

The Idea of the Labyrinth from Classical Antiquity through the Middle Ages Penelope Reed Doob 2019-03-15 Ancient and medieval labyrinths embody paradox, according to Penelope Reed Doob. Their structure allows a double perspective—the baffling, fragmented prospect confronting the maze-treader within, and the comprehensive vision available to those without. Mazes simultaneously assert order and chaos, artistry and confusion, articulated clarity and bewildering complexity, perfected pattern and hesitant process. In this handsomely illustrated book, Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages. Doob first examines several complementary traditions of the maze topos, showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity, while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity. She then describes two common models of the labyrinth and explores their formal implications: the unicursal model, with no false turnings, found almost universally in the visual arts; and the multicursal model, with blind alleys and dead ends, characteristic of literary texts. This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze, as Doob's examination of a vast array of materials from the classical period through the Middle Ages suggests. She

concludes with linked readings of four "labyrinths of words": Virgil's Aeneid, Boethius' Consolation of Philosophy, Dante's Divine Comedy, and Chaucer's House of Fame, each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it. Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition, but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works. Readers in such fields as Classical literature, Medieval Studies, Renaissance Studies, comparative literature, literary theory, art history, and intellectual history will welcome this wide-ranging and illuminating book.

Suicide in the Middle Ages: Volume 2: The Curse on Self-Murder Alexander Murray 2011-03-03 A group of men dig a tunnel under the threshold of a house. Then they go and fetch a heavy, sagging object from inside the house, pull it out through the tunnel, and put it on a cow-hide to be dragged off and thrown into the offal-pit. Why should the corpse of a suicide – for that is what it is– have earned this unusual treatment? In *The Curse on Self-Murder*, the second volume of his three-part *Suicide in the Middle Ages*, Alexander Murray explores the origin of the condemnation of suicide, in a quest which leads along the most unexpected byways of medieval theology, law, mythology, and folklore –and, indeed, in some instances beyond them. At an epoch when there might be plenty of ostensible reasons for not wanting to live, the ways used to block the suicidal escape route give a unique perspective on medieval religion.
