On the Integral and Derivative Identities of Bivariate Fox's H ...

A. Integral Solutions In this subsection, the closed-form statistics for definite and indefinite integrals are evaluated over bivariate fox's H-function in coordination with various mathematical functions. Theorem 1: For $x > 0, a > 0, \text{ and } b > 0$, the integral solution to (5) for definite interval $X > 0$ is expressed as $F(X) = \int_0^X H [ax, bx] dx = XH M1 \dots$
