Capitalist Nigger Chika Onyeani 2012-03-27 Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' – discipline, self-reliance, ruthlessness – to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

Running, Winning, Serving Craig Turner 2017-07-21 When you're running for local office for the first time, there are plenty of mistakes you can make. The good thing is that you're not the first person ever to face the challenges of running for office - even though sometimes it might seem like it. In this book, Craig W. Turner collects stories, advice, warnings and best practices from local candidates from around the country who have been there and done that. They've already seen what you're about to see, and they've generously shared their experiences for the benefit of you and other first-time candidates for local office. This is no poli-sci class. This is "in the trenches" life experience. Everyone interviewed for this book as part of The Campaign Coach Podcast, has run and won at least one election. Some are now retired, some have moved on to higher office, and some are still serving in the capacity we discussed in their interview. In these pages, you will find insights that no guidebook or online course can give you - they will inspire you, and scare you, and motivate you and smack you in the face with a reality check. But, they will also make you a stronger candidate. Whether it's talking with voters, fundraising, understanding local government policy, promoting your candidacy or even knowing how to best serve your community, learning from these people's experiences - and avoiding mistakes that they've already made for you - will give you a leg up on any opponent.

IBM FlashSystem 5200 is a high-performance storage solution that is based on a revolutionary 1U form factor. It consists of 12 NVMe Flash Devices in a 1U storage enclosure drawer with full redundant canister components and no single point of failure. It is designed for businesses of all sizes, including small, remote, branch offices and regional clients. It is a smarter, self-optimizing solution that requires less management, which enables organizations to overcome their storage challenges. Flash has come of age and price point reductions mean that lower parts of the storage market are seeing the value of moving over to flash and NVMe--based solutions. The IBM FlashSystem 5200 advances this transition by providing incredibly dense tiers of flash in a more affordable package. With the benefit of IBM FlashCore Module compression and new QLC flash-based technology becoming available, a compelling argument exists to move away from Nearline SAS storage and on to NVMe. With the release of IBM FlashSystem 5200 Software V8.4, extra functions and features are available, including support for new Distributed RAID1 (DRAID1) features, GUI enhancements, Redirect-on-write for Data Reduction Pool (DRP) snapshots, and 3-site replication capabilities.
