The Financial Crisis Inquiry Report Financial Crisis Inquiry Commission 2011-05-01 The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world.THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government."News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. eXtreme Project Management Douglas DeCarlo 2010-10-01 Today's new breed, eXtreme projects are different. They feature high speed, high change, high complexity, high risk, and high stress. While traditional projects follow the classic model of ready, aim, fire, eXtreme project managers succeed by shooting the gun and then redirecting the bullet while not loosing sight of their moving target. eXtreme Project Management provides a practical guide for leaders working under high risk and high pressure while producing the desired bottom-line results. Based on Doug DeCarlo's extensive experience in working with more than 250 project teams, his eXtreme project management model is built around an integrated set of principles, values, skills, tools, and practices proven to consistently work under conditions of rapid change and uncertainty. eXtreme project management is based on the premise that you don't manage the unknown the same way you manage the known. It's a people-centric approach to high performance that makes quality of life a fundamental part of the project venture.

World Investment Report 2020 United Nations Conference on Trade and Development (UNCTAD) 2020-07-15 The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Brand Aid Lisa Ann Richey 2013-11-30 "Has there ever been a better reason to shop?" asks an ad for the Product RED American Express card, telling members who use the card that buying "cappuccinos or cashmere" will help to fight AIDS in Africa. Cofounded in 2006 by the rock star Bono, Product RED has been a particularly successful example of a new trend in celebrity-driven international aid and development, one explicitly linked to commerce, not philanthropy. In Brand Aid, Lisa Ann Richey and Stefano Ponte offer a deeply informed and stinging critique of "compassionate consumption." Campaigns like Product RED and its precursors, such as Lance Armstrong's Livestrong and the pink-ribbon project in support of breast cancer research, advance the expansion of consumption far more than they meet the needs of the people they ostensibly serve. At the same time, such campaigns sell both the suffering of Africans with AIDS (in the case of Product RED) and the power of the average consumer to ameliorate it through familiar and highly effective media representations. Using Product RED as its focal point, this book explores how corporations like American Express, Armani, Gap, and Hallmark promote compassionate consumption to improve their ethical profile and value without significantly altering their business model, protecting themselves from the threat to their bottom lines posed by a genuinely engaged consumer activism. Coupled with the phenomenon of celebrity activism and expertise as embodied by Bono, Richey and Ponte argue that this "causumerism" represents a deeply troubling shift in relief efforts, effectively delinking the relationship between capitalist production and global poverty.

Where the Salmon Run Trova Heffernan 2017-05-01 Billy Frank Jr. was an early participant in the fight for tribal fishing rights during the 1960s. Today, he continues to support Indian country and people by working to protect salmon and restore the environment. Where the Salmon Run tells the life story of Billy Frank Jr., from his father's influential tales, through the difficult and contentious days of the Fish Wars, to today.
